THERMOCHIMICA ACTA, VOLUME 152 (1989)

SUBJECT INDEX

Acetonitrile,
Free energies of transfer for some monovalent ions and Ph_4SbBPh_4 from water to acetonitrile and acetonitrile–water mixtures using the asymmetric Ph_4AsBPh_4 assumption 371
Acetyl acetonates,
A thermoanalytic–mass spectrometric study of oxide-supported acetyl acetonates 359
Adsorbed gases,
Experiments on phase transition of adsorbed gases on porous glass—Part II 145
Air velocity,
An improved mechanical microanemometer for low air velocities 35
Aluminium chloride,
Thermal decomposition of 1-methyl-3-ethylimidazolium chloride (MEIC)/ aluminium chloride molten salts 421
Ammonium trioxalatochromate(III),
Dehydration of ammonium trioxalatochromate(III) and trioxalatoferrate(III) in relation with the preparation of metallic mixed oxides 77
Ammomium trioxalatoferrate(III),
Dehydration of ammonium trioxalatochromate(III) and trioxalatoferrate(III) in relation with the preparation of metallic mixed oxides 77
Ancient Egyptian balance,
The ancient Egyptian balance—Part II 243
Anemometry,
Use of balances in anemometry, Part II 29
Anisotropy,
Investigation of the anisotropy of Timahdit oil shale (Morocco) by dilatometry 197
Ankerite,
Thermal analysis studies of the dolomite–ferroan dolomite–ankerite series. II. Decomposition mechanism in flowing CO_2 atmosphere 279
Asymmetric Ph_4AsBPh_4 assumption,
Free energies of transfer for some monovalent ions and Ph_4SbBPh_4 from water to acetonitrile and acetonitrile–water mixtures using the asymmetric Ph_4AsBPh_4 assumption 371

Balances,
Use of balances in anemometry, Part II 29
Benedict–Webb–Rubin equation of state,
Comparison of Benedict–Webb–Rubin and Starling equations of state for use in P–V–T calculations of binary mixtures 341
Binary mixtures,
Applicability of the Lee–Kesler equation of state in P–V–T calculations for binary mixtures 407
Comparison of Benedict–Webb–Rubin and Starling equations of state for use in P–V–T calculations of binary mixtures 341
Blast-furnace-type slags,
Equilibrium of reduction of titanium oxides (from blast-furnace-type slags of the CaO–MgO–SiO_2–Al_2O_3–TiO_2 system in liquid phases 447
Buoyancy,
Application of buoyancy 149

Cadmium(II) octadecanoate,
The effect of cetyl trimethylammonium bromide additive on the electrical conductances of molten zinc(II), cadmium(II) and lead(II) octadecanoates 259
CaO–MgO–SiO_2–Al_2O_3–TiO system,
Equilibrium of reduction of titanium oxides from blast-furnace-type slags of the slags of the CaO–MgO–SiO_2–Al_2O_3–TiO_2 system in liquid phases 447
Carbonate apatites,
Simultaneous thermogravimetry and gas chromatography during the decomposition of carbonate apatites 65
Carbonate groups,
Study of the thermal decomposition of carbonate groups in sedimentary apatites by thermogravimetric analysis 125
Catalyst supports,
Thermal analysis and XRD studies on catalyst supports of potassium tungsten bronze and potassium magnesium titanium oxide 203
Cell cycle,
Native chromatin–DNA structure and cell cycle: differential scanning calorimetry and gel electrophoresis 307
Cetyl trimethylammonium bromide,
The effect of cetyl trimethylammonium bromide additive on the electrical conductances of molten zinc(II), cadmium(II) and lead(II) octadecanoates 259

Chromatin,
Native chromatin–DNA structure and cell cycle: differential scanning calorimetry and gel electrophoresis 307
Combustion,
The effect of particle size on the combustion of Weardale coal 215
Commercial engine oils,
Investigation of the thermo-oxidation stability of lubricating base oils and commercial engine oils by differential scanning calorimetry 427
Cool plasma ashing,
Thermogravimetry and cool plasma ashing of Timahdit oil shale 175
Copper sulphide,
Formation and reactivity of copper sulphide, Part I 227

Decomposition,
Simultaneous thermogravimetry and gas chromatography during the decomposition of carbonate apatites 65
Thermal analysis studies of the dolomite–ferroan dolomite–ankerite series. II. Decomposition mechanism in flowing CO_2 atmosphere 279
Desorption,
On some thermodynamic and kinetic aspects of desorption from zeolites under microwave irradiation 43
Dielectric constant,
Simultaneous determination of mass and dielectric constant of small samples with the microbalance 9
Dilatometry,
Investigation of the anisotropy of Timahdit oil shale (Morocco) by dilatometry 197
DNA,
Native chromatin–DNA structure and cell cycle: differential scanning calorimetry and gel electrophoresis 307
Dolomite,
Thermal analysis studies of the dolomite–ferroan dolomite–ankerite series, II. Decomposition mechanism in flowing CO_2 atmosphere 279

Electrical conductances,
The effect of cetyl trimethylammonium bromide additive on the electrical conductances of molten zinc(II), cadmium(II) and lead(II) octadecanoates 259
Enthalpy of decomposition,
Kinetic study by mass spectrometry and calculation of the enthalpy of decomposition of basic nickel carbonate 329
Enthalpy of transfer,
Principle of the estimation by titrimetric thermometry of the enthalpy and entropy of transfer of very lipophilic solutes from water to *n*-octanol 463
Entropy of transfer,
Principle of the estimation by titrimetric thermometry of the enthalpy and entropy of transfer of very lipophilic solutes from water to *n*-octanol 463

Ferroan,
Thermal analysis studies of the dolomite–ferroan dolomite–ankerite series. II. Decomposition mechanism in flowing CO_2 atmosphere 279
Flow-through tubular reactor,
Combination of a thermobalance with a flow-through tubular reactor 105
Four-step models,
Non-isothermal reaction kinetics. VI. Experimental two-step and four-step models in solution chemistry 387
Free energies of transfer,
Free energies of transfer for some monovalent ions and Ph_4SbBPh_4 from water to acetonitrile and acetonitrile–water mixtures using the asymmetric Ph_4AsBPh_4 assumption 371
Fusion,
Observations on the fusion–solidification behaviour of strontium chloride hexahydrate 271

Gas chromatography,
Simultaneous thermogravimetry and gas chromatography during the decomposition of carbonate apatites 65
Gravimetric sorption,
Suggestions for pore models on the basis of gravimetric sorption experiments 135

Hydrogen bonding,
Effect of hydrogen bonding on the thermal behaviour of substituted phenols 381

Indicator system,
Indicator system and suspension of the old Egyptian scales 249
Iraqi phosphates,
The kinetics of the thermal decomposition of natural Moroccan phosphates and Iraqi phosphates 115
Isonicotinates,
The different pathways of the thermal decomposition of metal nicotinates and isonicotinates 299

Kinetic study,
Kinetic study by mass spectrometry and calculation of the enthalpy of decomposition of basic nickel carbonate 329

Lead,
On the magnetic behaviour of superconducting lead discs 19
Lead deposits,
Vacuum microbalance studies of lead deposits from natural waters 87
Lead(II) octadecanoate,
The effect of cetyl trimethylammonium bromide additive on the electrical conductances of molten zinc(II), cadmium(II) and lead(II) octadecanoates 259
Lee–Kesler equation of state,
Applicability of the Lee–Kesler equation of state in P–V–T calculations for binary mixtures 407
Lime,
Reactivity of lime in paper manufacture 97
Lipophilic solutes,
Principle of the estimation by titrimetric thermometry of the enthalpy and entropy of transfer of very lipophilic solutes from water to *n*-octanol 463
Liquid phases,
Equilibrium of reduction of titanium oxides from blast-furnace-type slags of the CaO–MgO–SiO_2–Al_2O_3–TiO_2 system in liquid phases 447
Investigations into titanium distribution between metal and slag in liquid phases 433
Lubricating base oils,
Investigation of the thermo-oxidation stability of lubricating base oils and commercial engine oils by differential scanning calorimetry 427

Magnetic behaviour,
On the magnetic behaviour of superconducting lead discs 19
Magnetites,
Quantitative analysis by derivative thermogravimetry of oxidizable cations for finely divided manganese substituted magnetites 187
Manganese,
Quantitative analysis by derivative thermogravimetry of oxidizable cations for finely divided manganese substituted magnetites 187
Mass,
Simultaneous determination of mass and dielectric constant of small samples with the microbalance 9
Metal,
Investigations into titanium distribution between metal and slag in liquid phases 433
Metallic mixed oxides,
Dehydration of ammonium trioxalatochromate(III) and trioxalatoferrate(III) in relation with the preparation of metallic mixed oxides 77
1-Methyl-3-ethylimidazolium chloride,
Thermal decomposition of 1-methyl-3-ethylimidazolium chloride (MEIC)/ aluminum chloride molten salts 421
Microanemometer,
An improved mechanical microanemometer for low air velocities 35
Microbalance,
Simultaneous determination of mass and dielectric constant of small samples with the microbalance 9
Microwave irradiation,
On some thermodynamic and kinetic aspects of desorption from zeolites under microwave irradiation 43
Molten salts,
Thermal decomposition of 1-methyl-3-ethylimidazolium chloride (MEIC)/ aluminum chloride molten salts 421
Moroccan phosphates,
The kinetics of the thermal decomposition of natural Moroccan phosphates and Iraqi phosphates 115

Natural waters,
Vacuum microbalance studies of lead deposits from natural waters 87
Nickel carbonate,
Kinetic study by mass spectrometry and calculation of the enthalpy of decomposition of basic nickel carbonate 329
Nicotinates,
The different pathways of the thermal decomposition of metal nicotinates and isonicotinates 299

Octanol,
Principle of the estimation by titrimetric thermometry of the enthalpy and entropy of transfer of very lipophilic solutes from water to *n*-octanol 463
Old Egyptian scales,
Indicator system and suspension of the old Egyptian scales 249
Oxidation,
Formation and reactivity of copper sulphide, Part I 227
Oxide support,
A thermoanalytic–mass spectrometric study of oxide-supported acetyl acetonates 359
Oxidizable cations,
Quantitative analysis by derivative thermo-

gravimetry of oxidizable cations for finely divided manganese substituted magnetites 187
Oxidizing atmosphere,
Thermogravimetric determination in oxidizing and/or sulfidizing atmospheres of the behaviour of the steel Fe2, 25Cr1Mo either incoated or superficially aluminized 53

P–V–T calculations,
Applicability of the Lee–Kesler equation of state in *P–V–T* calculations for binary mixtures 407
Comparison of Benedict–Webb–Rubin and Starling equations of state for use in *P–V–T* calculations of binary mixtures 341
Paper manufacture,
Reactivity of lime in paper manufacture 97
Pathways,
The different pathways of the thermal decomposition of metal nicotinates and isonicotinates 299
Ph_4SbBPh_4,
Free energies of transfer for some monovalent ions and pH_4SbBPh_4 from water to acetonitrile and acetonitrile–water mixtures using the asymmetric Ph_4AsBPh_4 assumption 371
Phase transition,
Experiments on phase transition of adsorbed gases on porous glass—Part II 145
Phenols,
Effect of hydrogen bonding on the thermal behaviour of substituted phenols 381
Pore models,
Suggestions for pore models on the basis of gravimetric sorption experiments 135
Porous glass,
Experiments on phase transition of adsorbed gases on porous glass—Part II 145
Potassium magnesium titanium oxide,
Thermal analysis and XRD studies on catalyst supports of potassium tungsten bronze and potassium magnesium titanium oxide 203
Potassium tungsten bronze,
Thermal analysis and XRD studies on catalyst supports of potassium tungsten bronze and potassium magnesium titanium oxide 203
Precipitation,
The effect of particle size on the combustion of Weardale coal 215

Quantitative analysis,
Quantitative analysis by derivative thermogravimetry of oxidizable cations for finely divided manganese substituted magnetites 187

Reaction kinetics,
Non-isothermal reaction kinetics. VI. Experimental two-step and four-step models in solution chemistry 387
Reduction,
Equilibrium of reduction of titanium oxides from blast-furnace-type slags of the $CaO–MgO–SiO_2–Al_2O_3–TiO_2$ system in liquid phases 447

Sedimentary apatites,
Study of the thermal decomposition of carbonate groups in sedimentary apatites by thermogravimetric analysis 125
Silk conditioning,
Thermogravimetry and silk conditioning in Lyon. A little known story (1833–1974) 1
Simultaneous determination,
Simultaneous determination of mass and dielectric constant of small samples with the microbalance 9
Solid state,
Thermal isomerization of square-planar Ni(II) complex in the solid state 335
Solidification,
Observations on the fusion–solidification behaviour of strontium chloride hexahydrate 271
Solution chemistry,
Non-isothermal reaction kinetics. VI. Experimental two-step and four-step models in solution chemistry 387
Square-planar Ni(II) complex,
Thermal isomerization of square-planar Ni(II) complex in the solid state 335
Starling equation of state,
Comparison of Benedict–Webb–Rubin and Starling equations of state for use in *P–V–T* calculations of binary mixtures 341
Steel,
Thermogravimetric determination in oxidizing and/or sulfidizing atmospheres of the behaviour of the steel Fe2,25Cr1Mo either incoated or superficially aluminized 53
Strontium chloride hexahydrate,
Observations on the fusion–solidification behaviour of strontium chloride hexahydrate 271
Structure,
Native chromatin–DNA structure and cell cycle: differential scanning calorimetry and gel electrophoresis 307
Sulfidizing atmosphere,
Thermogravimetric determination in oxidizing and/or sulfidizing atmospheres of the behaviour of the steel Fe2,25Cr1Mo either incoated or superficially aluminized 53

Superconducting lead discs,
On the magnetic behaviour of superconducting lead discs 19
Surface tension,
Dynamic surface tension measurements on surface-active materials: Part II 165
Surface-active materials,
Dynamic surface tension measurements on surface-active materials: Part II 165
Suspension,
Indicator system and suspension of the old Egyptian scales 249

Thermal behaviour,
Effect of hydrogen bonding on the thermal behaviour of substituted phenols 381
Thermal decomposition,
Study of the thermal decomposition of carbonate groups in sedimentary apatites by thermogravimetric analysis 125
The different pathways of the thermal decomposition of metal nicotinates and isonicotinates 299
The kinetics of the thermal decomposition of natural Moroccan phosphates and Iraqi phosphates 115
Thermal decomposition of 1-methyl-3-ethylimidazolium chloride (MEIC)/ aluminum chloride molten salts 421
Thermal isomerization,
Thermal isomerization of square-planar Ni(II) complex in the solid state 335
Thermo-oxidation stability,
Investigation of the thermo-oxidation stability of lubricating base oils and commercial engine oils by differential scanning calorimetry 427
Thermobalance,
Combination of a thermobalance with a flow-through tubular reactor 105
Thermogravimetry,
Simultaneous thermogravimetry and gas chromatography during the decomposition of carbonate apatites 65
Thermogravimetry and cool plasma ashing of Timahdit oil shale 175
Timahdit oil shale,
Investigation of the anisotropy of Timahdit oil shale (Morocco) by dilatometry 197
Thermogravimetry and cool plasma ashing of Timahdit oil shale 175
Titanium distribution,
Investigations into titanium distribution between metal and slag in liquid phases 433
Titanium oxides,
Equilibrium of reduction of titanium oxides from blast-furnace-type slags of the CaO–MgO–SiO_2–Al_2O_3–TiO_2 system in liquid phases 447
Titrimetric thermometry,
Principle of the estimation by titrimetric thermometry of the enthalpy and entropy of transfer of very lipophilic solutes from water to *n*-octanol 463
Two-step model,
Non-isothermal reaction kinetics. VI. Experimental two-step and four-step models in solution chemistry 387

Vacuum microbalance
Vacuum microbalance studies of lead deposits from natural waters 87

Water,
Free energies of transfer for some monovalent ions and Ph_4SbBPh_4 from water to acetonitrile and acetonitrile–water mixtures using the asymmetric Ph_4AsBPh_4 assumption 371
Principle of the estimation by titrimetric thermometry of the enthalpy and entropy of transfer of very lipophilic solutes from water to *n*-octanol 463

Zeolites,
On some thermodynamic and kinetic aspects of desorption from zeolites under microwave irradiation 43
Zinc(II) octadecanoate,
The effect of cetyl trimethylammonium bromide additive on the electrical conductances of molten zinc(II), cadmium(II) and lead(II) octadecanoates 259
